

CATALOGUE

JohnsonSuisse Catalogue

Johnson Suisse Sdn. Bhd. is a subsidiary of ROCA Group - the world leader in the bathroom business, operating in over 135 markets.

Best known for our skilled expertise and strong history, JohnsonSuisse has secured a position firmly in the sanitary ware market and become a well-known industry name. Staying true to our core roots of the brand, a high standard of quality in materials as well as design elements are maintained throughout the impressive variety of products available.

Keeping up to date with trends and consumer needs, JohnsonSuisse offers ranges that will suit an array of consumers, from the classic and conventional to the more modern and contemporary.

Achieving a successful balance between functionality and visual excellence, JohnsonSuisse aims to elevate the bathroom area into a space that is sophisticated and modern with notable features that offer convenience and comfort of the highest quality.

Endorsements

Committed to excellence and progression, JohnsonSuisse standards are recognised worldwide with endorsements that include:

DIN

WELS-Certified

WELS is a water efficiency labelling scheme that registers and certifies products in accordance with the requirements, guidelines, terms and conditions set and issued by PUB, Singapore's national water agency. JohnsonSuisse strives to comply with the WELS scheme.

Our ratings are listed as:

💧 ✓ Good 💧 ✓✓ Very Good 💧 ✓✓✓ Excellent

This helps our customers to make informed choices on our water efficiency standards.

Lifetime Warranty

All vitreous china sanitary ware from JohnsonSuisse carry a lifetime warranty against manufacturing defects.

Faucet Warranty

JohnsonSuisse faucets are guaranteed to be free from manufacturing defects for 5 years from date of purchase, subject to warranty conditions.

Our Collection includes:

Wall-hung basins

These are attached to the wall and normally coupled with a pedestal. They make good space savers for small bathrooms.

Semi-recessed basins

Add that extra touch of elegance to your bathroom with these (semi-recessed) basins to enhance the perspective of the entire room matched with furniture. They also help to save space for a bathroom.

Undercounter basins

These basins are normally mounted underneath a bathroom furniture top giving it an elegant and seamless look.

Overcounter basins

Overcounter basins have the top of the rims over the bathroom furniture top giving it an integrated look.

Countertop basins

These basins sit on top of your bathroom furniture showcasing the beautiful design and shapes of the particular piece.

Guide:

Types of punched taphole

Pre-punched taphole ●

A taphole which is already punched and made ready for tap installation.

Semi-punched taphole ○○○

This option allows for the flexibility to install the tap at any location (left/centre/right).

Basins

Realising the visual importance of the basin in a bathroom, JohnsonSuisse offers a wide variety of choices to suit individual preferences for any bathroom aesthetic. From simple and classic styles to the more unique and contemporary, all JohnsonSuisse basins uphold the standard of quality and style.

Water Closets

JohnsonSuisse is a renowned name in the sanitary ware market and has put the highest quality standards and industry experience into the design and manufacture of WCs. With a wide variety of designs to choose from, JohnsonSuisse makes use of only the best materials in all ranges. Combined with a keen attention to detail, JohnsonSuisse WCs offer not only an excellent practical product, but a stylish visual appeal that stand out in any bathroom space.

Flush action:

Syphonic pans utilise a powerful suction (syphonic action/pull) to remove human waste. All syphonic WCs incorporate an 'S' shaped trap. The traps in these toilets are designed with slightly smaller diameters than a non-syphoning toilet, so that the water-way will naturally fill up with water, each time it is flushed, thus creating the syphon action.

Washdown pans utilise the sheer force and volume of the flush water (push) to remove human waste.

WCs:

Close-coupled WCs are built with the cisterns sitting atop the bowl.

One piece WCs integrate tank and bowl into a seamless, space-saving design that is easy to clean.

Wall-hung WCs are mounted on the wall and removed from the floor. For a minimal, modern and space saving toilet, wall-hung WCs are a perfect option.

Back-to-wall WCs keep the cistern (sold separately) and all the associated service connections concealed. They are neat in appearance.

Low-level WCs join wall-mounted cisterns to the pans with discreet short flush-pipes.

Flush systems

Single flush systems remove soil in a one big flush. Dual flush systems come with 2 modes, a half-flush for liquid waste and a full-flush for solid waste.

Water efficiency

We strive to comply and be certified by the Water Efficiency Labelling and Standards (WELS) scheme.

Our ratings include:

Products	Flush Capacity Requirements		
	Good 	Very Good 	Excellent 
Water Closets	4.5 / 3 litres	4 / 3 litres	3.5 / 2.5 litres

Guide:

Rough-In

The distance between the supporting wall to the center of the drain fixture.

Outlet

The drain outlet, either through the floor or into the wall.

Concealed cistern

A hidden cistern (tank), normally inside or behind a wall or encased.

Seat and cover

Standard seat and cover

Soft close seat and cover – features a hinge mechanism that allows the seat and cover to gently drop down when closed

Manual control push-button to operate the flush when needed.

Flush Valves & Concealed Cisterns

JohnsonSuisse allows the luxury of choice by offering a full range of installations from the conventional flush valve mechanism to the concealed cistern that discreetly hides the unsightly cistern, putting only the flush buttons on display. All JohnsonSuisse installations are aimed at enhancing the standard of style in the bathroom space.

Guide:**Recessed bath**

A bathtub that has all or part of the tub resting beneath the finished floor level of the bathroom (as opposed to a freestanding bath tub).

Anti-slip base

A non-slip surface for safety.

Handgrip

A handle to hold and grasp.

Bath Tubs

Luxury and indulgence are the key elements in JohnsonSuisse bath tubs. Understanding the clients need for relaxation, JohnsonSuisse has maximised on design elements that enhance comfort. Made from either acrylic or enamelled-steel, the range of bath tubs is not only visually appealing but also easy to maintain and will keep the pristine stylish standard over time.

Types of valves

The valve technology is what actually controls the flow of water. It's what really does all the work and has the most moving parts. How it's designed affects how well it performs. Our faucet uses two kinds of valve technology: compression and ceramic disk.

1. Headwork / compression valve faucets typically have separate hot and cold water handles. They're the simplest form of faucet valve and they control the flow of water by means of a screw-like feature in the handle that compresses a seal, which is usually a rubber washer. These valves usually wear the fastest and require maintenance sooner than other valve types (200,000 cycles). The advantage of this valve, it works well with low water pressure.

2. Ceramic disc valves make use of two hard, highly polished ceramic disks that slide relative to each other. The motion between the two disks controls the flow of water by opening or restricting the pathway for the water. Although they're typically more expensive, ceramic disk valves are considered the most durable and longest-lasting type of faucet valve (500,000 cycles)

Chroming

Brass is normally coated with chrome plating. Plating is another good surface finish treatment. Chrome plating has been the mainstay for plated finishes for a long time. Chrome plate is usually applied over faucets made from brass to provide protection to the brass from corrosion and tarnishing. Coating thickness is able to accomplish EN 200 standard.

Water efficiency

We strive to comply and be certified by the Water Efficiency Labelling and Scheme (WELS).

Product Categories	Flow Rate		
	Good  ✓	Very Good  ✓✓	Excellent  ✓✓✓
Shower Taps & Mixers	> 7 to 9 litres/min	> 5 to 7 litres/min	5 litres/min or less
Basin Taps & Mixers	> 4 to 6 litres/min	> 2 to 4 litres/min	2 litres/min or less
Sink/Bib Taps & Mixers	> 6 to 8 litres/min	> 4 to 6 litres/min	4 litres/min or less
Showerheads	> 7 to 9 litres/min	> 5 to 7 litres/min	5 litres/min or less

Faucets

With an impressive diverse range of faucets, JohnsonSuisse offers a wide variety from stand alone to complete ranges suited to accompany any bathroom style. Close attention to design combined with high quality raw materials and components, used to produce the faucets, ensure a confident product that embraces visual and practical standards.
